

**Delugan Meissl  
Associated Architects**

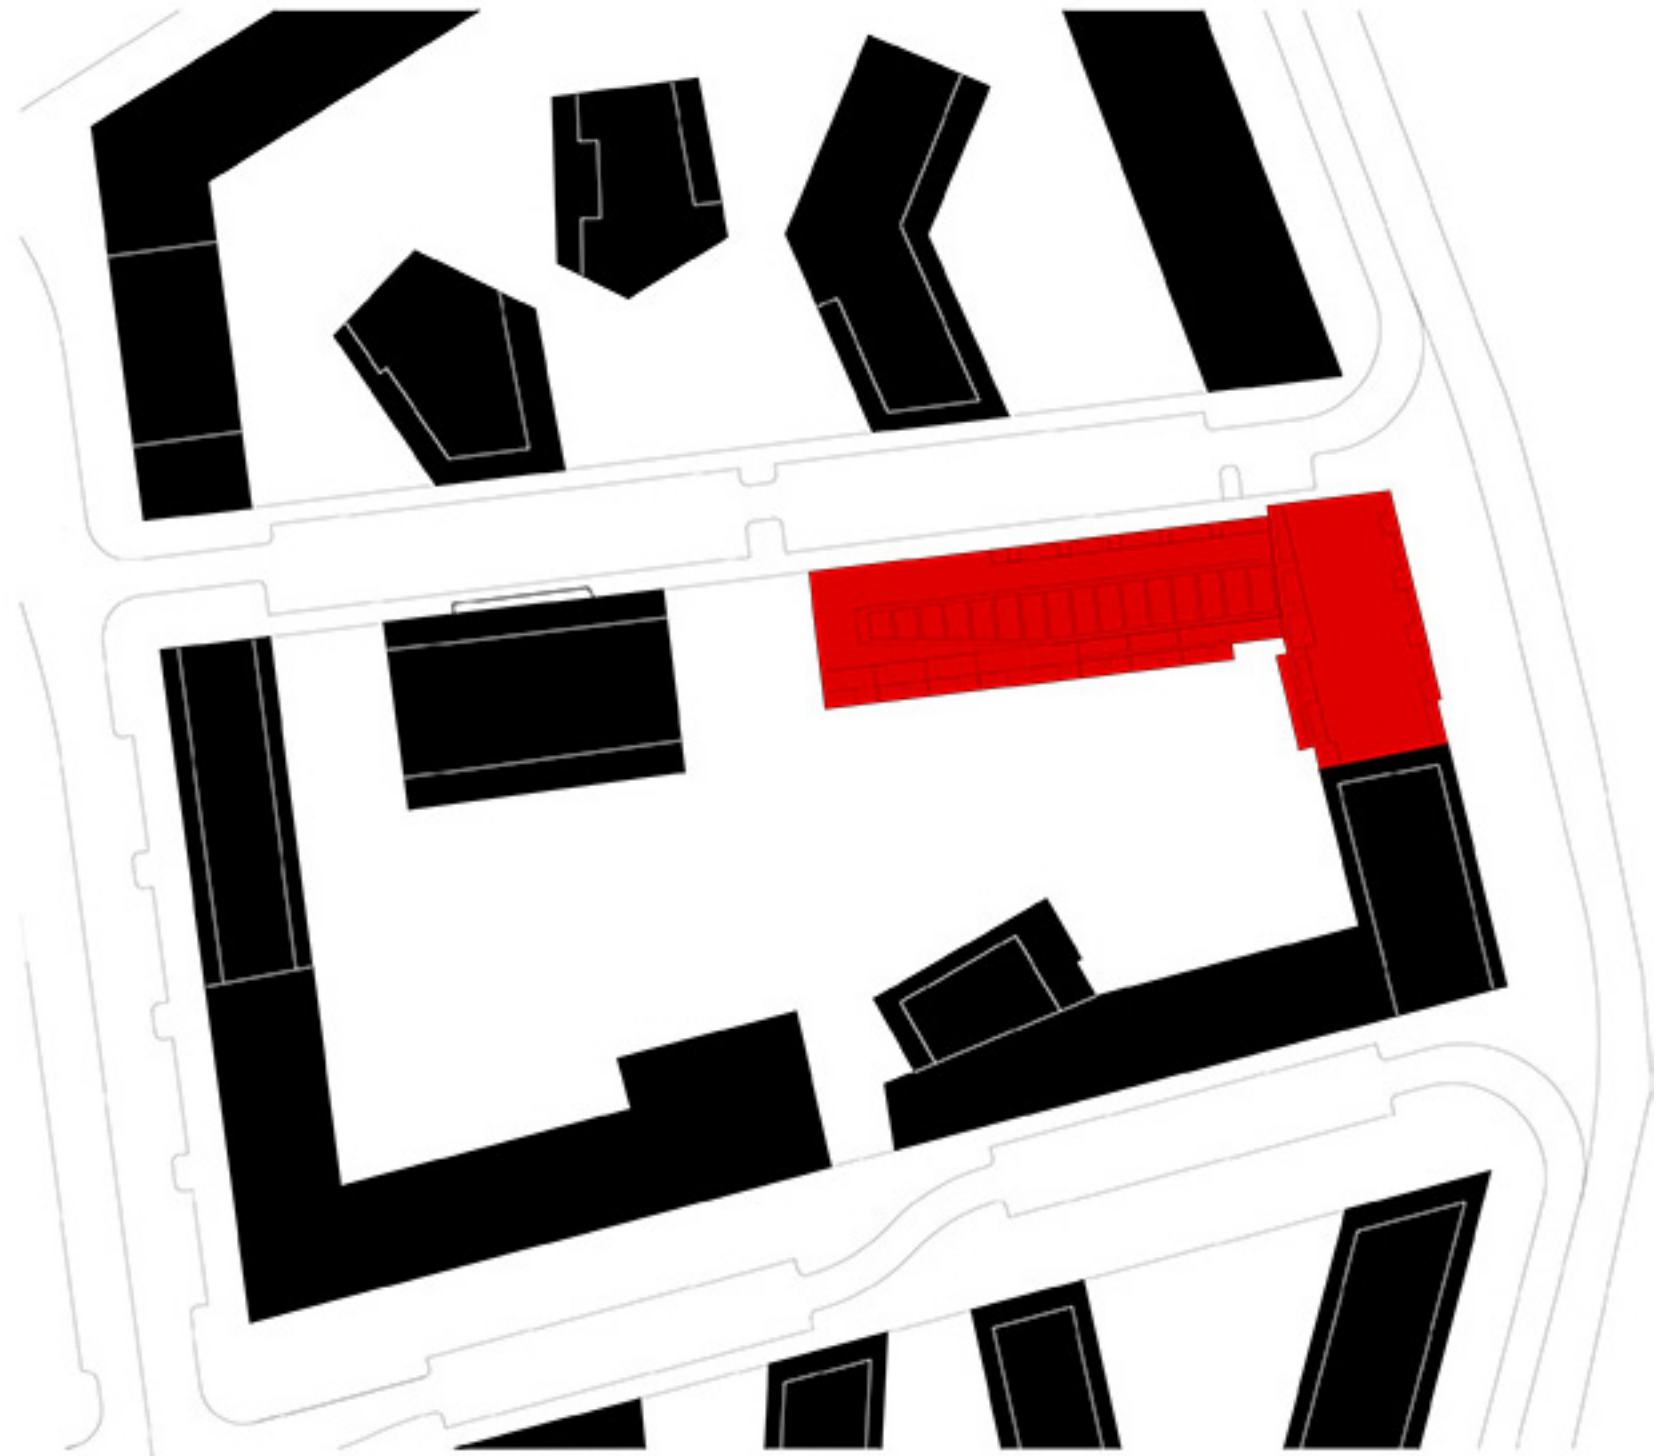

Sonnwendviertel | Social Housing  
Vally-Weigl-Gasse 1 | 1100 Wien

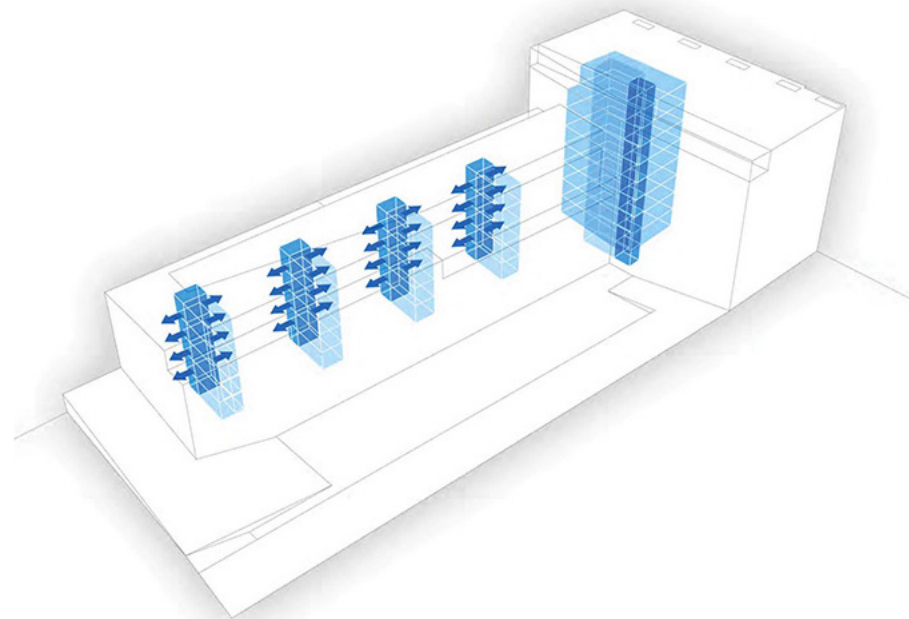

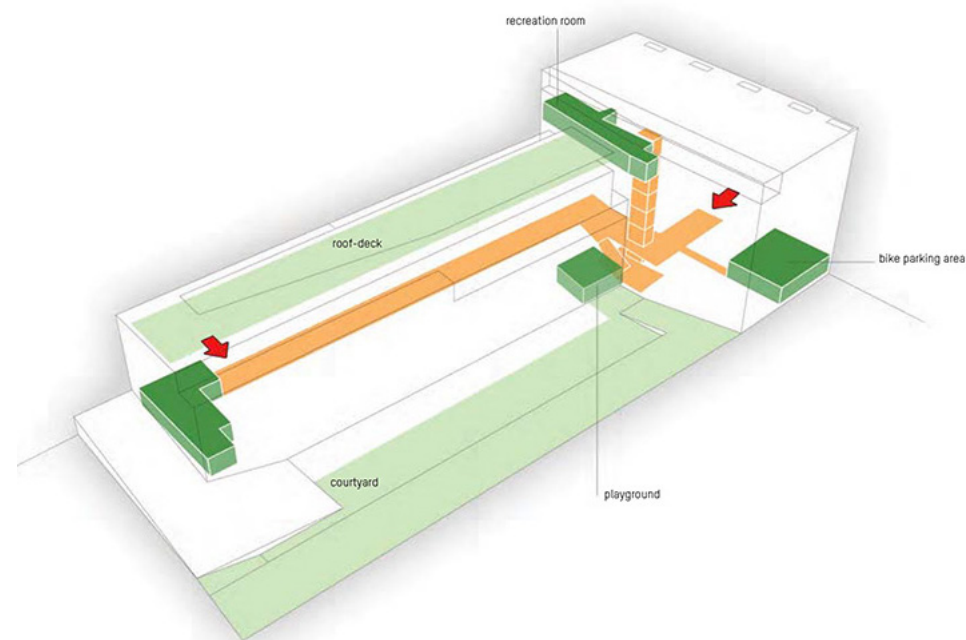

2013 | 92 residential units | families &  
elderly people

## site description

The project is located in the central area of the Sonnwendviertel, in the south of of the new Main Station.

The longer part of the L-shaped building is located to a residential street; the smaller part opens up to the Helmut-Zilk-Park.

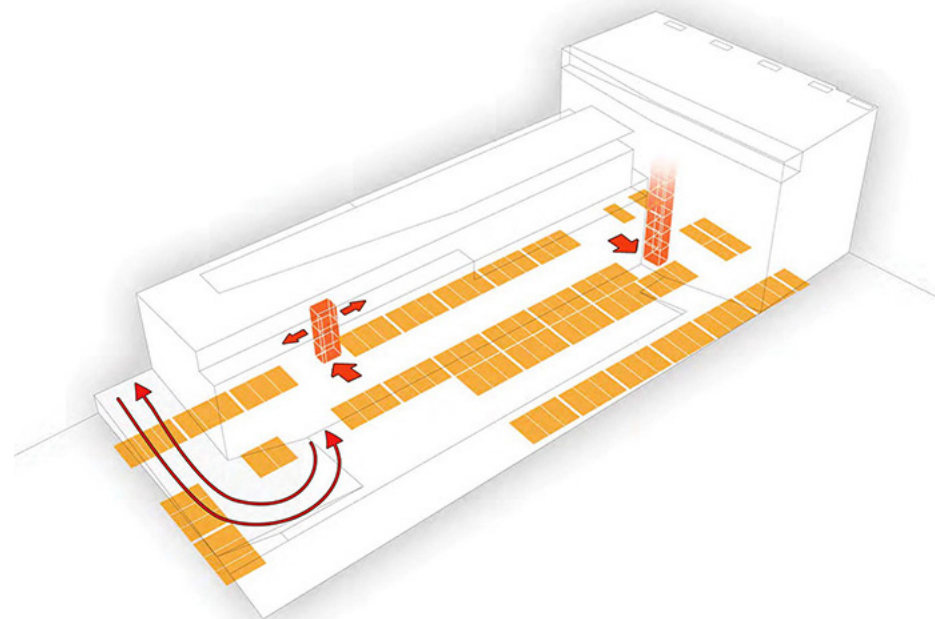

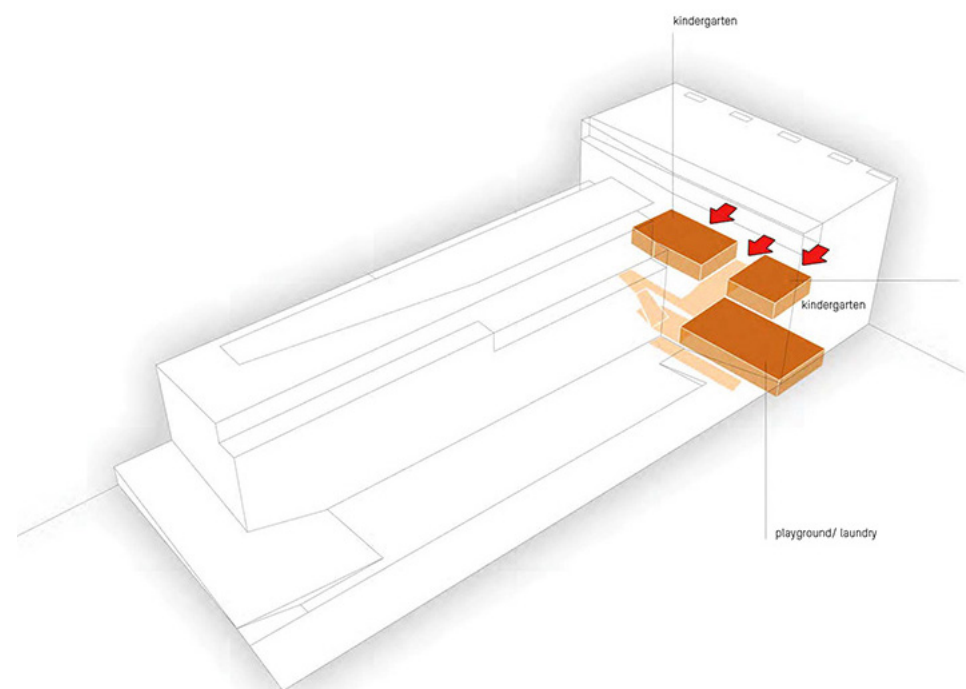

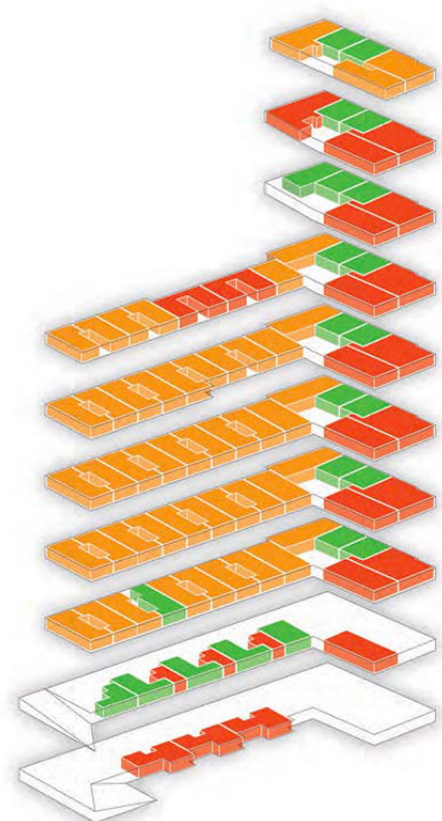

## building description

There are five cores, one main core with the central circulation and four smaller cores with separate staircases and elevators which have a direct connection into the apartments.

The building has 5 to 7 storeys, each part contains a specific general type of apartments.

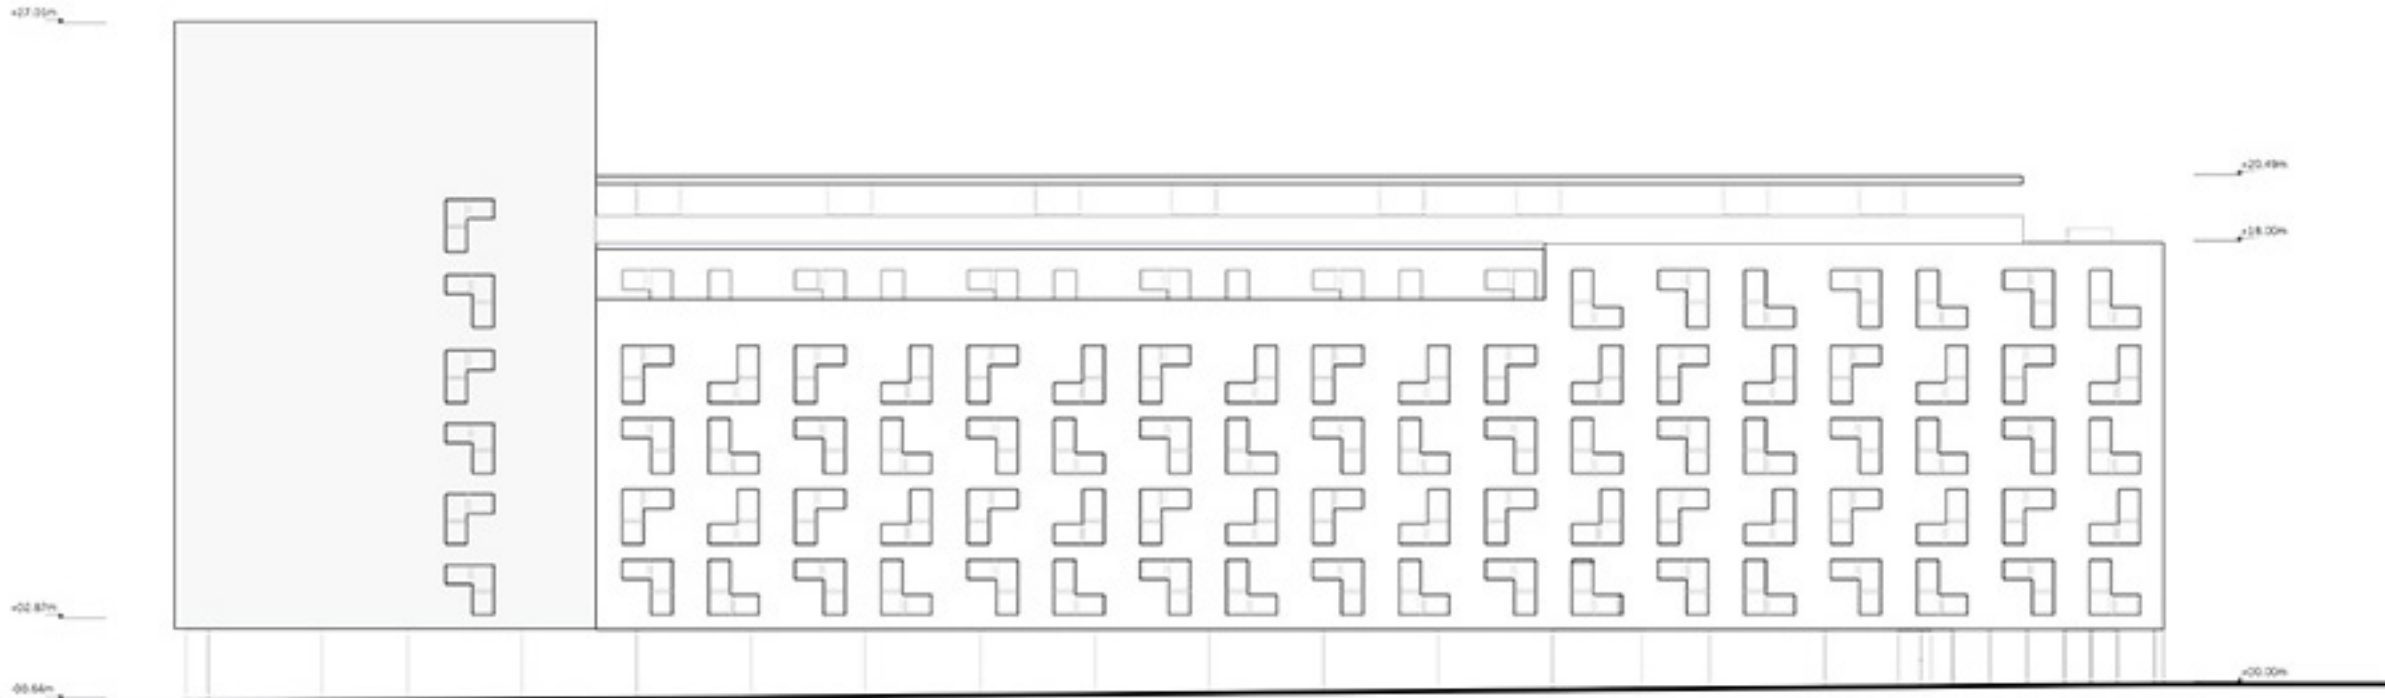

East Elevation

North Elevation

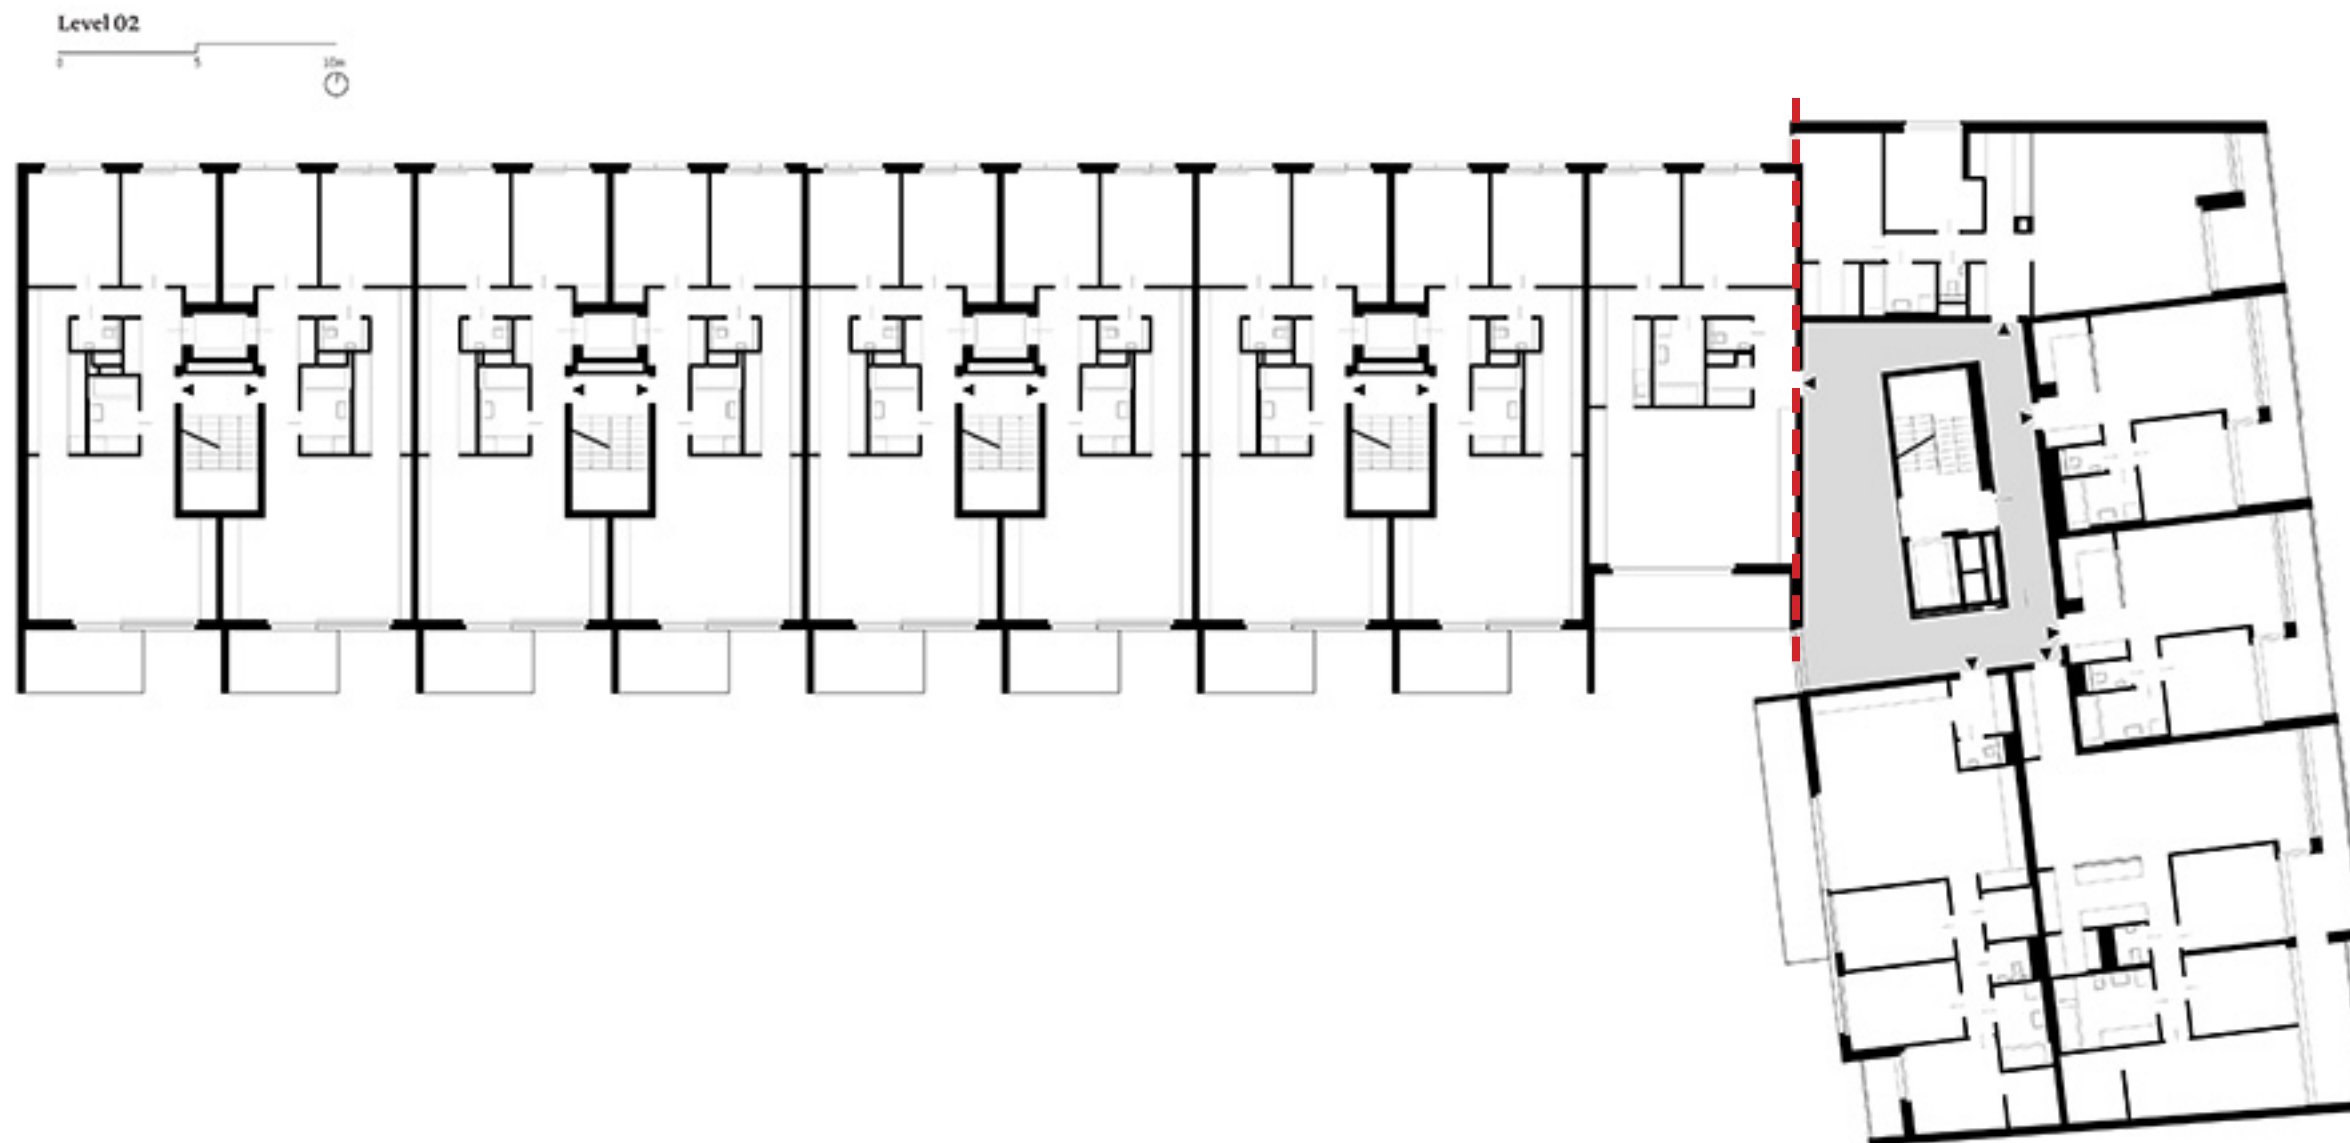

## ground floor

-> will not be modelled due to multi-storey units

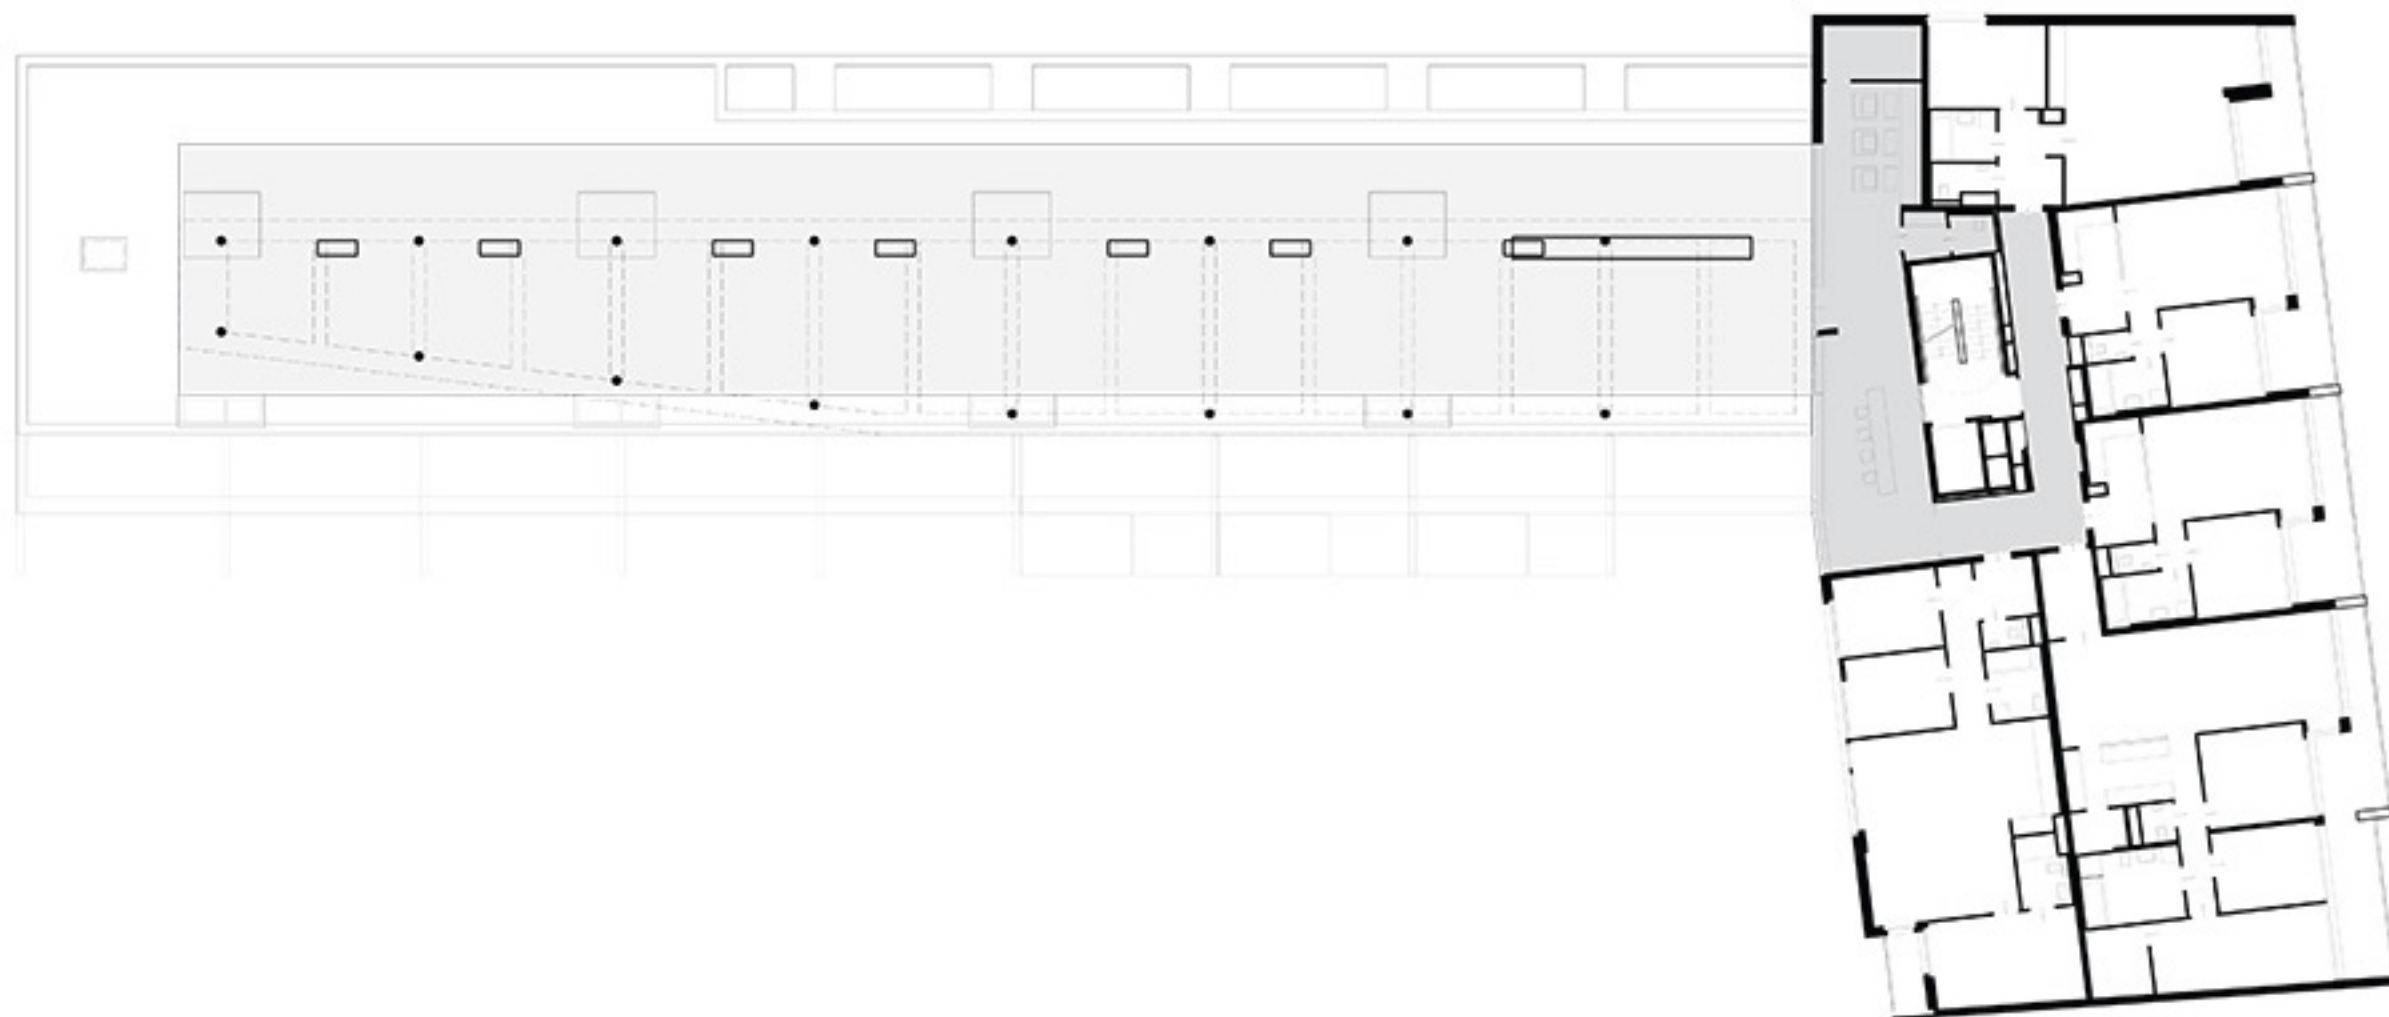

## regular floor

for modelling  
will be split into two seperate parts for more clear results

Level07

**suggested projects for comparison**

The database already contains four other projects of Delugan Meissl but they are all smaller so it might be interesting so compare those projects of another type with this project.

I would also suggest to compare this project with projects in Vienna; so city-based.
