

## 1 Selected Housing Project

Apartment building „Rondo“  
Graber Pulver Architekten  
Zürich, 2007

## 2 Project summary

„Rondo“ is an apartment building with 22 apartments in the north of Zürich. It is constructed from concrete and has a covering made of a chrome nickel steel mesh. The shape of the freestanding building is an irregular pentagon which is because of the complex form of the lot. The building has five storeys with up to five units per floor. In the center there is a large access hall that receives natural light from the top.
