

# Wohnhaus Flora

Architecture : Superblock

Net internal area : 3.400 m<sup>2</sup>

1st Prize Competition

Construction : 2014-2016

Nr. of Apartments : 52

The project is situated in the **21. District** on **Floridsdorfer Hauptstrasse** and is a privately financed housing project. It is divided in 3 buildings, therefore creating multiple courtyard areas that have various functionalities assigned. The housing complex features a concrete construction with a rhombus-textured metal façade that extends over the building entrance.

Architecture : Superblock

Regular floor

Ground floor

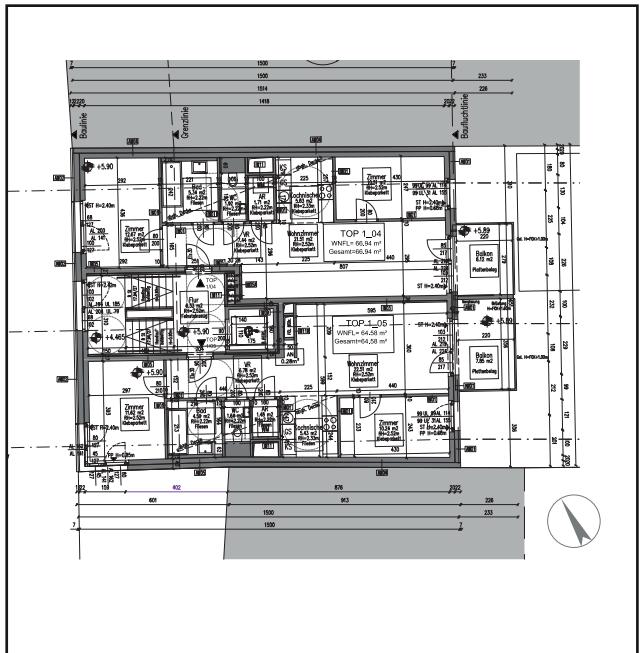

The housing units are between  $31\text{m}^2 - 110\text{m}^2$  and mostly receive direct sunlight from two opposite sides and are extended with balconies or terraces. While the street side building has its main access area within its internal area, the other two buildings have units accessible through an outer staircase.
